

# R5 / same shaped petals: open, common face contact, empty closure

Petal geometry only | R62 hinges | upper 0-105°, lower 0-113° | linkage, root supports and central head excluded

Six fixed separating planes: nominal continuous petal-to-petal gap lower bound 3.582 mm.  
Ø112 sphere at Z65 touches four finite luminous faces at 90°; this is one uncompressed geometry case, not a 2 kg grip qualification.
