

FORM02 / real-layer radial contact candidate

All panels use the same scale. $q = 90$ deg; roots $Z = 20$ mm. Cylinders and yaw45 square prisms: $Z55...115$ mm.

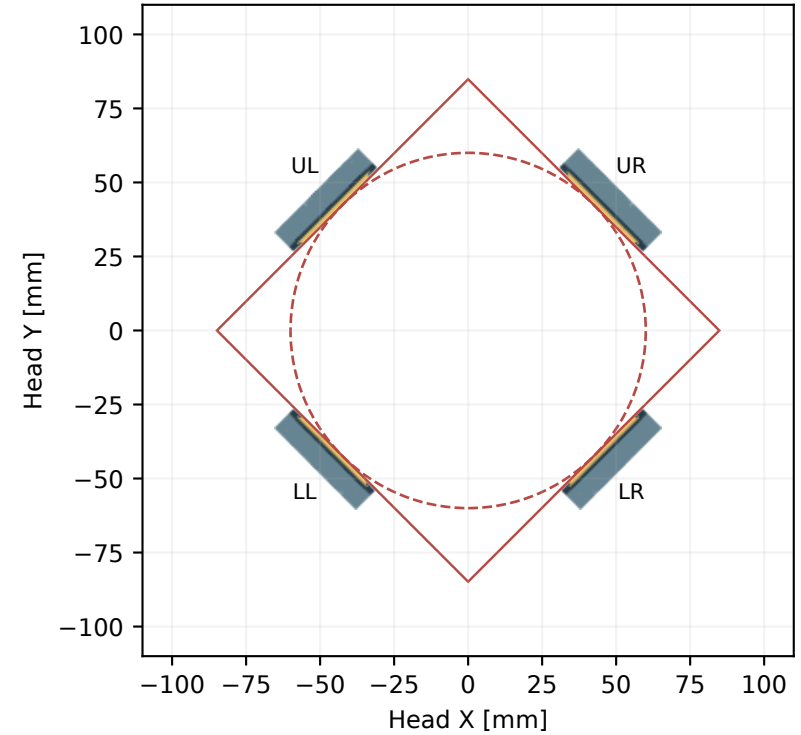

R 31 / object width 50 mm

R 46 / object width 80 mm

R 66 / object width 120 mm

All 28 solids inside rebuilt convex prisms; continuous independent-radius separation ≥ 2.828 mm.
Nominal finite-skin contact only. Square and cylinder outlines are overlaid alternatives, not simultaneous objects.
